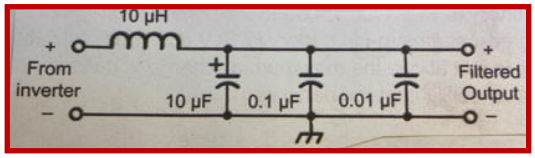
SEPTEMBER 2026

THE BIG ISLAND HAMGRAM

The newsletter of the Big Island Amateur Radio Club



Dealing with low voltage on mobile rigs

By Hank Kaul, KH6HAK

Most modern ham radios are designed to operate at 13.8 volts DC. This is supposed to be the nominal voltage supplied in an automobile.

But many rigs will not tolerate lower voltages below 12.8 volts or so, and shut down. With wiring losses throughout a vehicle, this 13.8 voltage may only be found directly at the battery terminals.

So for a 'good' install, you attach heavy gauge wire to the battery terminals, run the wires thru the firewall, and attach to your radio that is presumably in the dash area.

That's a lot of work, and not always possible. And if you must install the radio farther back or in the trunk of the vehicle, the wiring losses rise and make larger gauge wire impractical.

Grid Madness is Sunday, 9/27 Details on Page 3

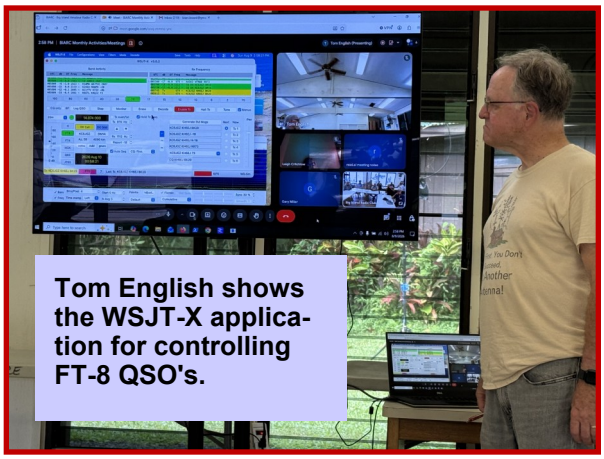
FT-8 hands-on demo enjoyed at BIARC August meeting

Photos by Mark Watanabe, WH6FSA

BIARC's series of FT-8 tutorials by John Bush, KH6DLK, and Tom English, WH6EBS, continued with a hands-on session in August. Members had been invited to watch and listen and ask questions, and to bring their own radios, as well.

Tom English and John Bush continued their tutorial series on FT-8 with a hands-on session presented at the Aug. 9 monthly BIARC meeting at Kamana Center in Hilo.

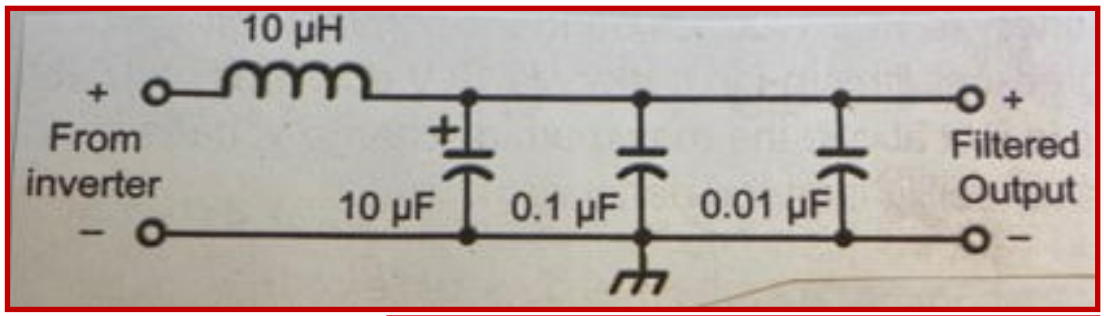
Tom English deploys an end-fed wire antenna in preparation for FT-8 activity at the BIARC August meeting.



Tom English shows the WSJT-X application for controlling FT-8 QSO's.

Dealing with low voltage on mobile rigs

Continued from Page 1



The older autos used to have a cigarette-lighter plug that was 20-amp fused and battery connected, so it worked even with the ignition off. Not so with modern cars now.

Cigarette-type power plugs are designed for low-load device chargers, typically fused at 10 amps, and turned off with the ignition. They are not really suitable for powering a ham radio that might draw up to 20 amps.

My Nissan Titan truck has several of these outlets. One is on the center console in the rear seating area. The most convenient and logical place for my Kenwood TM D-700 radio is under the rear seat, with a small remote head up forward in the dash area. But a 10-amp outlet with small gauge wire voltage drop will not suffice here.

So my first solution was to place a small 12 volt gel-cell back near the rig as a 'booster battery'. It would charge from the cigarette lighter plug when the truck was running, and when the rig went into 'transmit' it would supply enough current to keep the rig alive.

It worked only somewhat. The battery didn't always acquire a full charge, and the rig frequently would shut down when transmitting was tried.

You will see from the images that I use dual banana-plug connectors for powering my ham radios. They have several advantages over the common power-pole connectors. Banana plugs have large conductor surface area for high current, they are self cleaning when sliding in and out, and they are stackable for multiple connections! Each dual plug has a dual jack on the backside. So it is easy to connect several items to your power buss. Just stack the connectors!

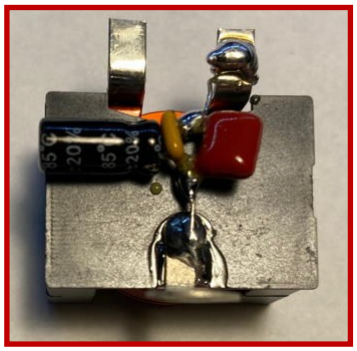
I found the perfect solution to my low rig voltage in QST magazine for June 2026 on page 42. It is the Aediko 25A DC/DC voltage converter that will supply a constant 13.8 volts DC output with as little as 9 volts input! It is available from Amazon for $38. The UPC code is. 687117788948

https://www.amazon.com/AEDIKO-Converter-Regulator-Waterproof-Regulated/dp/B0GTPJRP3L

This little block will do the job of keeping your voltage up, but it is not quite 'radio ready'. Like most switching mode power supplies, it puts out a bit of noise that is objectionable on the radio. The ARRL lab tested it and found some 100 kHz trash on the output. So they put together a small low-pass filter to put on the output DC line to quiet the noise. The filter is based upon a 10 uH ferrite coil rated for 20 amps with some bypass capacitors across the line. This is a COILCRAFT SER2918H-103.
It is available from various electronic parts suppliers. I found mine on eBay for $12.

The 10uF capacitor sets the basic low-pass cutoff at around 50kHz, and the smaller capacitors of different dielectric types will shunt high frequency trash noise effectively. The third terminal on the ferrite coil plate is isolated and used here as a connection point for the capacitors and negative power lead. I used large heat-shrink tubing to insulate the whole coil assembly, but you could also wrap it securely with electrical tape to prevent anything shorting to the connections.

And it works just fine!



The APRS 'squawker' works OK and the 2-meter voice section sounds fine with no objectionable buzz. And most importantly, the rig does not do a low-voltage shutdown when I transmit.

Hank, KH6HAK

A request for help at Nov 7 parade

Calling all Radio Operators: Help is needed for the Veterans Day Parade Saturday November 7th getting participants lined up properly. We need you and your HT to help get the participants in the proper order to keep the parade going out in a timely manner. Your help is requested.

We will have a base tent near the start of the parade on Pauahi Street and the rest of us will be taking care of making sure everyone is where they are supposed to be so things are ready to start. You'll need to be there at 8 AM to get an assignment area and then help get everyone where they need to go. Last year things involved being directory assistance, finding people as needed and telling others to please step it up.

We'll have chilled water at the tent and some snacks. Parking will be behind either the Texaco station or across the street at the soccer field, so it's a short walk.

Mahalo, Jim, WH6EMN

AE5P (Former AH6P) Silent Key

Army Curtis Jr., SK

Bob Schneider, AH6J, provides this tribute to his longtime associate and friend, Rankin Armstrong "Army" Curtis Jr., AE5P (Former AH6P).

Curtis was born July 14, 1941 in Arizona and became a Silent Key August 16 in Texas. Services were on August 21 in Texas.

"Army", as most knew him, was a retired Electrical Engineer in both Texas and Hawaii. He was very active in Amateur Radio and several service organizations such as Rotary International and Shriner's. He also did private consulting work and worked as an engineer for a radio station in Hawaii.

He was elected as the Pacific Section Manager for the American Radio Relay League (ARRL) for two terms -- April 1982-April 1984 and February 1986 – March 1988. He also served in many other officer positions in the ARRL and several radio clubs. He was most active in the Big Island Amateur Radio Club (BIARC) in Hawaii and the Nacogdoches ARC in Texas.

"He retired from Hawaii Electric Company after 27 years and moved to Texas with his wife, Pat," said AH6J, "He will be greatly missed."

Annual Grid Madness simplex event set for Sunday, Sept. 27

Hippo Dude

2026 Grid Madness mascot

Grid Madness is set to debut its 2026 edition of the popular simplex event at the end of the month.

And all licensed hams are invited to participate.

The unique fall event will be held on Sunday, Sept. 27, from 1300 until 1700 HST.

This date was picked especially not to conflict with the Ka'u Coffee Trail Run, which draws a big group of ham volunteers helping with communications for the races. The Ka'u event will be staged on the previous Sunday.

Details are being firmed up, and info specific to the 2026 Grid Madness event is now provided at https://gridmadness.blogspot.com/

Check that site for details, and get an overall feel for the contest. It will seem familiar to previous participants, since information doesn't change much from year to year.

Grid Madness is a statewide event, and last year Hawaii Island hams were joined by folks on Kauai, Maui and Oahu. There was lots of relaying going on and plenty of comments about how much fun everyone had.

The contest is open to licensees at all levels and is on simplex only.

The four-hour event is designed for EMCOMM practice, and for FUN.

Test your equipment, coverage and operating skills using FM simplex on 6 meters, 2 meters, 1.25 meters and 70 cm.

The Hawaii County Siren Report for September 2026

From Darrell Asuka, KH6RDO, for the Big Island ARES Group:

In summary, we got 2 more sirens that failed this month (HPP Awapuhi & Laupahoehoe Point) and 1 partially working siren (Banyan).

Membership dues are due

We have noticed that quite a few past members have not renewed their membership for 2026 and we are asking that you please consider renewing your membership for this year.

We have a number of projects that need additional funding to sustain them in the future.

Also, membership is prorated as the year goes along so it will cost quite a bit less if you renew in September. Please talk to Fred when you come to the meeting to renew.

Thank you very much.

Jim Tatar
Secretary

Science Night outreach event at Keonepoko earlier this year.

Two School Science Night events this month

The BIARC Education and Outreach Committee has scheduled two "on the road" educational networking visits this month.

The first is:
Location: EB de Silva Elementary School
Date: Wednesday September 9
Time: 5:00 PM to 7:00 PM

And, at the end of the month:
Location: Waiakea Elementary School
Date: Wednesday September 30
Time: 5:00 PM - 6:30 PM

Regards,
David, KH6CZ,
EOC Chair

Monthly breakfast gathering

The informal multi-club First Saturday of the Month Breakfast gathering is an East Hawaii tradition. Over the years, interested hams have met at varying venues on that first Saturday.

There's no formal agenda, and everyone is welcome. The current setup is at 7:30 a.m. at IHOP restaurant in Hilo.

Isle amateur radio operators turn out in force for Lala

From the ARRL Letter published August 20

Lala approaches within 50 mile of the Big Island

Last week, while the Midwest was facing heavy rain, wind, and tornados, Hawaii was bracing for Hurricane Lala. The eye of the hurricane skirted Hawaii's Big Island without making landfall but left heavy wind and rain damage. On Saturday, August 15, and Sunday, August 16, 2026, amateur radio operators throughout the state assisted emergency management agencies during the hurricane's approach.

Ron Hashiro, KH6D, RACES/ AUXCOMM Coordinator for the Hawai'i Emergency Management Agency (HIEMA), said there were many amateur operators and agencies involved.

"We had great assistance from local, state, county, federal, military agencies, including the National Guard, and now we are also working with FEMA," said Hashiro.

Several Big Island locations received over 3 feet of rain, with Laupāhoehoe recording more than 43 inches in just two days. The Nāhuku Lava Tube and Nene Cabin, one of two A frame vacation cabins located just outside Hawaii Volcanoes National Park in Volcano, received just over 37 inches of rain. Hurricane-force gusts up to 140 mph were recorded at Mauna Kea's summit.

Last Saturday and Sunday were the worst days as the hurricane headed for the Big Island. National Weather Service (NWS) radar for Saturday, August 15, 2026, 14:10 HST, showed the 50-mile approach of Hurricane Lala to South Point on the Big Island. South Point is the southernmost location in the United States. The greatest damage occurred at Naalehu in the Big Island district of Kau, where the runoff from the torrential rains on Saturday night devastated the community. Roads were blocked and damaged, which isolated and impeded response.

Joe Tabrah, AH6T, ran the hourly ARES HF Watch nets on 7090 kHz. Carter Davis, KH6FV, manned the HF position at the HIEMA AUXCOMM radio room, handling reports from the local 40-meter and ARES nets on 7090 kHz and submitted the information through to HIEMA staff, supported by Peter Yuen, KH6JBS, and Ron Hashiro, KH6D.

In a wide-ranging and detailed report, Hashiro noted that on the main island of Oahu, the Department of Emergency Management (DEM) activated its RACES unit on Saturday to supplement their emergency response. Michael Miller, KH6ML, and Mark Kaku, KH6LT, headed up the unit with radio operators including Ralph Miranda, WH7PD, and Keith Higa, WH7GG, running the net on the around-the-island RACES VHF repeater network. They kept staff updated with reports sent from the field. Reservist Ralph Toyama, NH6PY, was dispatched to Waikiki to assist the Honolulu Police Department with traffic and pedestrian control to free the officers to respond to other areas.

Local television station KHON2 covered the Manoa Stream water levels as they reached 14 feet: Manoa Stream hits record stream flow during Tropical Storm Lala

As the hurricane continues to move away, at least one person has died and over 100 homes have been damaged. Road access to Naalehu has been reestablished. At the peak of the storm, over 200,000 customers were without power. Thousands remain without power with 95% restoration to the hardest hit section of Kau district estimated to be done by September 8.

Hashiro's report, with updated information, has been posted to his AH6RH webpage. The complete link is: www.qsl.net/ah6rh/am-radio/ hawaii/hurricane-lala.html.

Route 66 on the Air

Route 66 has been celebrating its centennial, 1926 – 2026, all year. The 100th anniversary still has events scheduled across the country, and there is time left to join the fun...especially if you're an amateur radio operator!

Route 66 on the Air 2026 is scheduled for Saturday, September 12 to Sunday, September 20 ... a nine-day window for amateur radio operators to participate. Twenty-five special event stations under the 1×1 W6 call sign have been set up for this event.

The goal is to commemorate the history of the "Mother Road" connecting the eastern and western United States. Through stories, songs, and TV shows, the highway came to symbolize the spirit of the freedom of the open road, inspiring many to see America.

Established on November 11, 1926, Route 66 was part of the U.S. highway system and stretched approximately 2,448 miles, from Chicago, Illinois, to Santa Monica, California, passing through eight states: Illinois, Missouri, Kansas, Oklahoma, Texas, New Mexico, Arizona, and California. Known as the "Main Street of America" and later dubbed the "Mother Road" by John Steinbeck in his 1939 novel, The Grapes of Wrath, it became an iconic symbol of American mobility and opportunity.

However, the demise of Route 66 began in the 1950s as the U.S. began building the interstate highway system, and the highway was officially decommissioned in 1986. Today, small portions of the U.S. Highway 66 still exist in towns and rural areas in several states.

Much of the original Highway 66 has been rerouted into a fast-moving interstate, bypassing many of the small towns and interests of this nation. Every year, Route 66 on the Air takes place to remember, celebrate, and share the enthusiasm and memories that Highway 66 represented in its time… and even today.

A map of the original highway shows its route from Santa Monica, California to Chicago, Illinois.

To find stations participating in Route 66 on the Air, browse the calendar at www.route66centennial.org. The ARRL Special Events Stations database also includes listings. Search for the keyword "66".

The Route 66 Centennial Commission Act was passed by Congress and signed into law by President Trump in 2020. The Act creates a commission, with representatives from each of the eight Route 66 states, to recommend activities to commemorate the 100th anniversary in 2026.

Order Your ARRL America250 Worked All States Award Certificate

If you've already confirmed contacts with all 50 states during the ARRL America250 Worked All States (WAS) operating event, you can now order your commemorative award certificate. The attractive, frame-worthy certificate celebrates your participation in this once-in-a-lifetime event honoring America's 250th anniversary.

ARRL is a Supporting Partner of America250 and the ARRL America250 WAS operating event complements the 2026 ARRL Year of the Club. Icom America is the Official Sponsor of the ARRL Year of the Club. Together, ARRL and Icom are supporting activities that spotlight the vital role of amateur radio clubs in communities across the country.

The America250 WAS event runs through December 31, 2026, and is based entirely on Logbook of The World® (LoTW®) confirmations. Earning the basic award requires confirmed contacts with all 50 states made during 2026.

From The ARRL Letter: a unique way to 'CW'

Musician and ARRL Life Member Lauren Speeth, KK6NGE, has developed a unique way to learn Morse code, using electric bass and puppies!

Her free MorseBass.com website combines music and visuals to help learners recognize and remember CW characters.

The site also includes a list of common "CW Chat Words" commonly used in on-air QSOs, helping learners quickly recognize frequently used words.

Talking to a satellite over Norway

From The ARRL Letter:

An interesting experiment took place recently in the skies over Oslo, Norway.

Amateur radio operators from the Oslo Group of the Norwegian Radio Relay League (NRRL), using an experimental satellite and homebrew ham equipment, successfully reprogrammed the satellite to respond to voice control.

On July 27, 2026, a verbal command, sent via a 23-centimeter signal from the roof of the Oslo Group's club station, was received, transcribed, and executed on board the OPS-SAT PRETTY satellite. The satellite then activated the game DOOM in response, and downloaded images of the game as confirmation. Voice control of a satellite was a reality, performed by radio amateurs in the Oslo Group!

The spacecraft is operated by Graz University of Technology in Austria and the experimentation is coordinated by the European Space Agency's European Space Operations Centre (ESOC) in Darmstadt, Germany.

The OPS-SAT PRETTY is a 3U CubeSat (10 x 10 x 34 cm) with a reconfigurable processing platform that allows a wide range of custom software and firmware experiments, and is tightly connected to an onboard software defined receiver (SDR).

Everyone involved in the experiment agreed that amateur radio infrastructure can support technically meaningful spacecraft experiments when RF design, signal processing, craft software, and disciplined operations are treated as one system.

Can the satellite be programed to talk back in an AI human voice?

"For this satellite, the Satellite Experimental Processing Platform (SEPP) where the experiments run, is connected to an SDR, receive only," said team member Eskil Hadland, LB6AJ. "As far as I know, the TMTC (Telemetry and Telecommand) is outside of the SEPP. So I do not believe this satellite will be able to talk back to us. Unlike other satellite operations for amateurs, where you can listen when you are aiming directly, we have been shouting towards the stars, and gotten data back hours later."

So what is next step with voice command communications?

"As for the next step, we are also curious about what it will be," added Hadland. "This experiment has been initiated by Georges Labrèche, whom together with Ólafur Waage, were the first to successfully run the game DOOM on the OPS-SAT back in 2023 (Not OPS-SAT PRETTY). Neither of them are radio amateurs, but are into the software development field.

Labrèche has suggested, as mentioned in our report at doom.lb6aj.net/#future, that a next step might be e.g., "PRETTY TURN OFF SDR" to act on an actual payload of the satellite, making it a control interface. But this might meet resistance from the team at ESA. We also have some other ideas regarding amateur radio, building further on this experiment, but we are not sure yet. But time will tell."

The Project Page at partner Tanagra Space tells the whole story from end to end, with the postcard the satellite composed on board and the gameplay sequence it captured as it flew: tanagraspace.com/opssat-pretty-doomed.

Thanks to the Oslo Group of the Norwegian Radio Relay League for taking time to talk with the ARRL Letter about their accomplishments.

The amateur radio operator speaking into the microphone in the evening pass is Jon Bergli Heier, LB9BJ. [Photo courtesy of Truls Johansen, LA7IJ]
